# Who

**Gas BB** participants **upgrading** to Gas Data Model 2.0 from previous Gas Data Model versions and interested in continuing to receive data for the following tables:

Table name
<b>GAS_CAPACITY_TYPE</b>
<b>GAS_CONTACT</b>
<b>GAS_CONTACT_DETAIL</b>
<b>GAS_MARKET</b>
<b>GAS_PARTICIPANT</b>
<b>GAS_PARTICIPANT_CONTACT</b>
<b>GAS_PARTICIPANT_CONTACT_TRK</b>
<b>GAS_PARTICIPANT_DETAIL</b>
<b>GAS_PARTICIPANT_OPSTATE</b>

---

**Note:** If you are doing a full install, this fix does not apply to you.

---

## Problem

Due to changed mapping configurations for existing tables preserved for Gas Data Model 2.0, the new mappings automatically sent to participant systems were required to be sent as inactive to preserve compatibility with majority of the participant systems.

## Fix

To continue receiving data, participants must set the tables (as indicated above) to active.

## How do I set the tables to active?

You can set the tables to active using one of the following methods:

- Use Replication Manager
- Use pdrMonitor
- Run the script below in your database:

```
update
    pdr_report_records
set
    is_active=1
where
    report_name='GASBB'
    and DESTINATION_TABLE in
        ('GAS_CAPACITY_TYPE',
        'GAS_CONTACT',
        'GAS_CONTACT_DETAIL',
        'GAS_MARKET',
        'GAS_PARTICIPANT',
        'GAS_PARTICIPANT_CONTACT',
        'GAS_PARTICIPANT_CONTACT_TRK',
        'GAS_PARTICIPANT_OPSTATE',
        'GAS_PARTICIPANT_DETAIL'
        );
```
