

GBB (WA) 1.11 (BUILD 345) RELEASE NOTES

Published: **September 2018**

IMPORTANT NOTICE

Purpose

The Australian Energy Market Operator (AEMO) has prepared this document to provide information about the GBB (WA) 1.11 (Build 345) release, as at the date of publication.

Disclaimer

This document or the information in it may be subsequently updated or amended. This document does not constitute legal or business advice, and should not be relied on as a substitute for obtaining detailed advice about the Gas Services Information Rules, or any other applicable laws, procedures or policies. AEMO has made every effort to ensure the quality of the information in this document but cannot guarantee its accuracy or completeness.

Accordingly, to the maximum extent permitted by law, AEMO and its officers, employees and consultants involved in the preparation of this document:

- make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of the information in this document; and
- are not liable (whether by reason of negligence or otherwise) for any statements or representations in this document, or any omissions from it, or for any use or reliance on the information in it.

1. INTRODUCTION

These are the release notes for GBB (WA) 1.11 (Build 345). This release addresses important issues described in sections below.

2. RESOLVED ISSUES

	Reference	Summary	Details
●	GISP-1008	Clarification of error message in Registration > Capacities menu.	When a user enters invalid information in the Registration > Capacity section of the GBB(WA), the error message now displays on a new line for improved readability. For example, "Enter a future Gas day" when an invalid date is entered now appears below the date fields rather than beside.
●	GISP-938	Updates Terms of Use information.	When a user clicks on the Terms of Use link at the bottom of the GBB(WA) website, a Terms of Use window appears over the top of the current webpage and displays the <i>Gas Bulletin Board WA (GBB) User Agreement</i>. Rather than being required to click Accept or Decline, the user now only has the option to click Close. In addition, if a user instead opens the Terms of Use link in a new tab within the browser, the information will now be displayed correctly instead of displaying a blank webpage.
●	GISP-808	Removal of the Disclaimer information.	The Disclaimer link and the Terms of Use link on the GBB(WA) were referring to the same information which is known as the <i>Gas Bulletin Board WA (GBB) User Agreement</i>. To avoid duplication and confusion, the Disclaimer link has been removed and has been replaced by the existing Terms of Use information.
●	GISP-805	Clarification of message in Registration > Facilities > Connections screen.	When a user enters revised information in the Registration > Facilities > Connections section of the GBB(WA), the confirmation message now displays with the correct spaces between each word for improved readability.
●	GISP-1018	Updates to AEMO's Market Operations System Monitoring Interface (MOSMI) following the release of RCM 1.9.	MOSMI performs daily checks to ensure Market Participants have submitted the required information in the GBB(WA) in accordance with their obligations outlined in Part 3 of the GSI Rules, and alerts the AEMO Duty Operator when an obligation is not met. Some of the application properties have internal dependencies on other AEMO systems and needed to be reinstated following the release of RCM 1.9.
●	GISP-972	Updates to schedule the MOSMI alerts for missed GSI submissions to an earlier time.	MOSMI performs daily checks to ensure Market Participants have submitted the required information in the GBB(WA) in accordance with their obligations outlined in Part 3 of the GSI Rules, and alerts the AEMO Duty Operator when an obligation is not met. The alerts have been scheduled to run earlier to allow the AEMO Duty Operator sufficient time to contact the Market Participant and advise that the deadline for their submission is approaching.

Status	
●	Internal changes
●	Minimal or no impact to Market Participants
●	Needs Market Participants' attention. Potentially requires system or operational procedure changes

MEASURES AND ABBREVIATIONS

Abbreviations

Abbreviation	Expanded name
AEMO	Australian Energy Market Operator
GBB (WA)	Western Australian Gas Bulletin Board
