

Hello,

I am concerned the hydrogen stuff is overegged because in my experience it is utterly uneconomic.

I'd like to share a link to a comparison of electrolyser capex forecasts.

<https://www.linkedin.com/pulse/difference-between-hydrogen-visions-reality-values-visa-siekkinen-dnpjf/?trackingId=VuO%2B9XQt43awwY%2FDqYISJw%3D%3D>

Electrolysers are mature technology and won't scale in cost like solar, wind and batteries which had multiplicative improvements to their performance.

Kind regards,

Tom Geiser

Head of Australia
