Name of Abbreviation/Acronym/Term	Description or Meaning
MPI	Market Participant Interface
RC	Reserve Capacity
WEMS	Wholesale Electricity Market System

1. Introduction

This document contains the release notes for WEMS 3.11 Patch 2 (Build 3.11-374-93).

2. New features

No new features have been included in this release.

3. Resolved issues

	Ref.	Description	Comment	Rating
	WEMS-5711	Facility standing data fields which utilise 'D', 'H', 'M' and 'S' boxes to specify a time was only allowing thirty minute interval values, but should allow any specific time value.	Minutes field now configured to range over an hour instead of just one interval.	Major
	WEMS-5683	MPI allows for lower case participant and facility short names which causes compatibility issues with other MPI functions.	When creating participant and facility short names (including facility upgrades), input values are automatically capitalised.	Minor
	WEMS-5665	RC Testing reports show incorrect meter data where a NMI has been transferred in and out of the same DSP.	RC Testing reports now show correct meter data for all DSPs	Minor

Status Key

	Internal changes
	Minimal or no impact to Market Participants
	Needs attention. Potentially requires system or operational procedure changes
